conducted by Penske Racing Shocks

ENTRY FEE IS \$75 Per Person/Per Class

Please use one form per person/event being entered

December 5, 2009
9:00AM-3:00PM

Suspension Dynamics and Tuning for Motorcycles

This course covers the design, terminology and theory of motorcycle suspension and forks, and the practical application of those items to motorcycles on a race track. The class will utilize a variety of available tools and resources from Penske Racing Shocks to explain various adjustments, including a shock dyno graph. Following a morning classroom session, students will tune their personal track day or racing motorcycles in New Jersey Motorsports Park's garages, with hands-on assistance. The course will be taught by Mike Himmelsbach, Motorcycle Department Manager, and Aaron Lambert, Production Manager, of Penske Racing Shocks.
